Open character, spacious feeling

Your own fresh market

The original Market, introduced by Smeva in 2005, is a self-service display case in which pre-packaged refrigerated products are presented with the appearance of a market square was introduced in 2005. The Market is a very spacious display case that cools perfectly with its sloping, deep presentation plateau.

With its open design, the products can be seen at a glance and lie at a convenient height. The many design options allow you to customize the Market to meet your needs.

Segmented bumpers and additional frames create the impression of small, individual display cases, which reinforces the marketplace feeling. If desired, however, the Smeva Market can be delivered as a single 3.75 metre-long element.

All the pre-packaged products, such as meat, fish, vegetables, cheese, tapas and meals, can be refrigerated in the Market.

Configuration

Various configurations are possible with the Market.

- ▶ Stand alone
- ▶ Back-to-back
- ▶ Island with head unit

The Market is available in a plug-in version, which is easy to move and therefore perfectly suitable as a promo display case. Or in a remote version, where a compressor unit is required.

We are enthusiastic about cooling. This is what distinguishes Smeva from the competition. We've been developing, manufacturing and supplying first-class refrigeration and freezer solutions for customers across the world since 1920. Smeva supplies to specialty stores, supermarkets, healthcare and non-profit organisations, hotels, restaurants and caterers, and to the non-food industry. Optimal storage conditions and high-quality guaranteed everywhere.
